

CHMRC

LOCAL IMPACT | GLOBAL COLLABORATION

01

OUR MISSION AND VISION

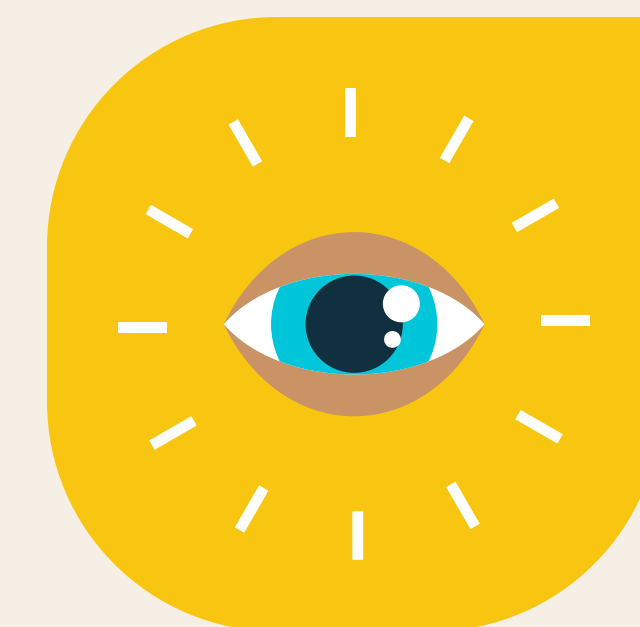

Mission

Our mission is to empower communities in the pursuit of community resilience and health equity through collaboration and innovative technologies.

Vision

Our vision is to empower communities, transforming health and building resilience and equity for all with a foundation of compliance, privacy, and trust.

02

OUR HISTORY

Founded in 2014, CHMRC is a 501(c)(3) nonprofit organization that has significantly impacted community health and resilience. Our journey began with the mission to assist and support communities during various challenges, especially during COVID-19.

With a strong commitment to public health, we conducted over 80,000 COVID-19 tests and administered vaccines to approximately 30,000 individuals.

Our dedicated efforts took place at the Solano Health Hub and the Solano County Fairgrounds, demonstrating our unwavering commitment to the well-being of our community. Since then, in 2023 we have expanded our focus to further pursue community health and resilience within three key areas: Community Resilience, Public Health Reporting and Medical Reserve Corps.

04

MESSAGE FROM THE CEO

I am extremely proud to release CHMRC's 2023 Annual Impact Report. This report will showcase many of the accomplishments in 2023, but also show that CHMRC has grown and stretched beyond the MRC work into a journey of pursuing community resilience and public health reporting. We look back with great pride at what we accomplished with our partners. Because of our dedicated employees, we are on the right path as we continue to build upon and transform our mission and vision into action and impact.

Ellen Young, CEO
CHMRC

WHO WE ARE: A SNAPSHOT

Community Resilience: At CHMRC, our mission is rooted in community resilience. We believe in the power of collaboration and actively engage with local community-based organizations, public health departments, health systems, and health plans. Through meaningful listening sessions and ongoing engagement, we identify and address gaps affecting underserved populations. This approach allows us to uncover key challenges and needs, paving the way for securing frameworks and funding for vital projects. From ensuring access to vaccines and screenings to providing trusted support where it's needed most, we are dedicated to enhancing community well-being through actionable initiatives.

Public Health Reporting: Efficiency and accuracy lie at the core of our efforts in the realm of public health reporting. We are committed to streamlining processes, eliminating outdated data sharing methods, and increasing efficiency and savings for health systems. Our innovative approach ensures that real-time data flows seamlessly to public health departments, providing invaluable insights into community health trends and identifying critical gaps. By embracing technology and modern solutions, we empower health systems to make informed decisions that positively impact public health.

Medical Reserve Corps: CHMRC extends its reach beyond routine initiatives to stand as a pillar of support during public health emergencies and beyond. As a Medical Reserve Corps, we offer resources and expertise to communities. Whether coordinating logistics for field clinics or responding to disaster sites, our goal is to ensure communities have the necessary supplies and support during challenging times. This commitment underscores our dedication to being a reliable partner in response, education, safeguarding communities, and strengthening resilience public health and well-being.
